(ii) Salary Increases

Limits on Compensation (iii) and Benefits

Basis

(iv) **Expenses** 

Basis

#### b. Demographic Assumptions

(i) Mortality The 2022 IRS Static Mortality Table. Basis Prescribed by IRS regulation.

(ii)	Termination of Employment	Withdrawal rates do not apply if eligible for retiree benefits. Sample annual rates of withdrawal are as follows:
		AgeRate20.21025.16730.13235.10440.08145.06250.0555.08
	Basis	2018 experience study.
(iii)	Retirement	Employees are assumed to retire according to the following rates:
		AgeProbability Per Year50 - 545%55 - 588%59 - 6312%64 - 6920%70100%
	Basis	2018 experience study.
(iv)	Disablement	None assumed.
(v)	Marital Status	For valuing death benefits, 66 2/3% of Participants are assumed to be married with males 3 years older than their females spouses.
(vi)	Form of Payment	For the normal form of benefit, 33 1/3% of all participants are assumed to receive the Joint and 100% Survivor annuity with 10 years guaranteed. The other 66 2/3% receive a life- only annuity.
		The cash balance account, if any, is assumed paid as a lump sum.

Basis

*Plan experience and expectations of future experience.* 

### c. Change in Actuarial Assumptions

All actuarial assumptions used in this valuation are the same as those used in the prior valuation, except for the required changes in the IRS mandated funding interest rates and mortality table.

#### d. <u>Changes in Plan Provisions</u>

All Plan provisions used in this valuation are the same as those used in the prior valuation.

### ACTUARIAL METHODS

#### a. Funding Method

The Pension Protection Act (PPA) requires the calculation of the Target Liability and Target Normal Cost. The Target Liability represents the present value of benefits accumulated as of the valuation date. The present value is calculated by projecting future payments of the accrued benefit, adjusting for probability of receipt according to demographic assumptions, and discounting the payments back to the valuation date using the segment interest rates. Payments expected within five years of the valuation date are discounted using the first segment rate, payments expected at least five but within 20 years of the valuation date are discounted using the second segment rate, and payments expected at least 20 years from the valuation date are discounted using the third segment rate. The calculation of the Target Normal Cost is identical, except that the future payment stream is based on the benefit expected to accrue during the plan year.

#### b. Asset Valuation Method

For funding purposes, the actuarial value of assets is defined as the smoothed market value of assets. The smoothed market value will be the market value of assets adjusted by the applicable percentage of the gain or loss calculated in each year during the smoothing period. The gain or loss is the difference between the current year's market value and prior year's market value brought forward with contributions, benefit payments, and administrative expenses, all adjusted for interest to the valuation date. The applicable percentage is 66-2/3% for the year preceding the valuation date and 33 1/3% for the second year preceding. The actuarial value of assets will be adjusted to be no greater than 110% and no less than 90% of the current (market) value of assets.

#### c. Valuation Procedures

No liability is held for non-vested, terminated employees, even if a break-in-service had not occurred as of the valuation date.

## Schedule SB, Part V – Summary of Plan Provisions

#### **Effective Date**

The Original Plan was effective September 1, 1950. For any Department not yet participating in the Plan, the effective date of the Plan with respect to that Department will be the September 1<sup>st</sup> next following the Department's election to participate. The Plan was amended September 1, 2008 to change future benefit accruals from a traditional formula to a cash balance formula. The Plan was most recently restated effective September 1, 2018 and amended August 31, 2020.

#### Anniversary Date and Plan Year

The Plan anniversary date is September 1 each year and the plan year begins on September 1 and runs through the following August 31.

#### <u>Eligibility</u>

An employee who works 1,000 hours in his first year of employment or a subsequent plan year is eligible for participation on the next following March 1 or September 1, provided he is at least age 21 on that participation date. **Employees hired after September 1, 2006 are excluded from the Plan.** 

#### **Earnings**

Effective September 1, 1991, Monthly Earnings are 1/12 of the cash compensation received during the Plan Year including overtime but excluding bonus or discretionary nonrecurring compensation. If the employee worked less than 2,080 hours during the Plan Year the compensation amount is adjusted to an annual amount based on the ratio of 2,080 to actual hours worked.

Previously, Monthly Earnings were the monthly salary or wages, including overtime (based on overtime paid in the previous 12 months), but excluding bonus or discretionary nonrecurring compensation that had been paid on July 1 prior to the anniversary date. The monthly earnings remain constant during the Plan Year.

#### **Average Monthly Earnings**

The average monthly earnings for the five highest consecutive plan years prior to September 1, 2008.

#### Normal Retirement

A member's normal retirement date is the first day of the month coincident with or immediately following his 65<sup>th</sup> birthday. The normal retirement date is age 65 with 5 years of service for Plan participants on and after March 1, 1996. Upon attaining his/her normal retirement date, a member may retire and receive a benefit equal to the sum of the following:

- (a) 1.60% of the first \$1,300 of Average Monthly Earnings plus 1.75% of Average Monthly Earnings in excess of \$1,300, multiplied by years of credited service as of August 31, 2006,
- (b) 1.4% of Average Monthly Earnings times Credited Service earned between September 1, 2006 and August 31, 200`8.

## Schedule SB, Part V – Summary of Plan Provisions

#### The plan was amended to freeze benefits for all Participants effective August 31, 2007.

#### Late Retirement Benefit

Upon actual retirement, the member is entitled to a benefit based on his/her benefit at actual retirement date.

#### Early Retirement Benefit

A member who has attained age 50 and completed 15 years of service may retire and receive an immediate monthly pension equal to his/her actuarial equivalent of the Cash Balance Account plus the sum of 6(a) and 6(b) above reduced as detailed below.

If the member has at least 25 years of service, the reduction applied to his/her accrued benefit will be ¼% for each of the first 60 months, 5/12% for each of the next 60 months, and actuarially thereafter for each additional month by which the commencement date precedes his/her normal retirement date. If the member has less than 25 years of service, the reduction will be 1/180 for each of the first 60 months, 1/360 for each of the next 60 months, and actuarially thereafter for each additional month by which the commencement date.

A participant may retire and receive an immediate monthly pension if their age plus service is greater than or equal to 75. If their age plus service is between 75 and 79, the reduction applied to the accrued benefit is 3% multiplied by the difference between 80 and the sum of age plus service. No reduction is applied if age plus service equals or exceeds 80.

#### **Termination Benefit**

If the member has at least 5 years of service at termination, he/she is entitled to receive at his/her normal retirement date a monthly income equal to his/her accrued benefit, as defined in item 6 above.

#### **Pre-Retirement Death Benefit**

If a married member who has met the requirements for early retirement should die prior to actual retirement, his/her spouse is entitled to a death benefit. The death benefit is an immediate monthly lifetime income equal to the benefit which would have been payable to the spouse if the member had taken early retirement (or late retirement, if applicable) on the day before his/her death under the joint and 100% survivorship form of payment. A married participant who dies after 5 years of service and prior to eligibility for early retirement, is entitled to a death benefit equal to the accrued benefit at date of death reduced for early commencement and the joint and 50% survivor option and payable at the participant's earliest retirement.

If an unmarried member should die in active employment without meeting the age and service requirements for early retirement, no benefits are payable.

## Schedule SB, Part V – Summary of Plan Provisions

A death benefit is also payable to the Beneficiary of a single participant who is eligible for early retirement and has died. The death benefit is equal to the early retirement benefit that would have been payable had the participant retired on the date of his/her death. The benefit is payable for 120 months.

#### **Optional Forms of Payment**

The standard form of payment is a life annuity for unmarried participants or 100% joint and survivor annuity with 120 payments guaranteed for married participants. Optional forms of payment include life annuities with 60, 120 or 180 payments guaranteed; 100%, 75% and 50% joint and survivor annuities; or 60, 120 or 180 payments guaranteed with no additional benefits.

Except for the following, monthly benefits are reduced to be actuarially equivalent to a life annuity:

- a. there is no reduction in the monthly benefit to add a 120 payment guarantee to the 100% Joint & Survivor standard form;
- b. participants with 20 but less than 30 years of service monthly benefits accrued as of August 31, 2006 are reduced only 50% of the full actuarial equivalence reductions; and
- c. participants with 30 years of service monthly benefits accrued as of August 31, 2006 are reduced only 25% of the full actuarial equivalence reduction.
